

Duopoly Build Alpha 0.0.9

Frontend Phase 1

Register/Login/Landing Page

Parameters

- You must include a Navbar with A Hamburger button to be used on mobile , both should be attached to the top
- The Navbar must say "Duopoly by Tanay and Yatee" with the font matching the aesthetics of the original game and Duopoly being larger in size
- Please choose the font face for the rest of the page as you please
- The theme must be dark as the current version will be space based
- There should also be a bottom navbar with button that says "Report Bugs" on the right and the following links on the left
 - Credits
 - Talk to the Developers
 - Give Suggestions
 - Visit our blog
 - Advertise here
- The above links should be well styled
- The center of the bottom navbar should have two boxes, side by side, with a circle in the upper-center of each that will later contain our images separately. Also leave some space after the circle in the box, which will contain our names
- The pages must be mobile friendly
- The page must be as less scrollable as possible for desktop versions, and on scrolling only can one see the bottom navbar
- You will need to include custom CSS and JS in the same file in style and script tags as the deployment server by Heroku is too laggy
- There should be a central logo with the term Duopoly, it may be a PNG image or text
- Below the logo, there should be two buttons, one that says "Play Now" and another that says "Invite Friends". Those buttons should go nowhere
- There should also be a slider with 3 demo space images for now right beneath the two buttons
